

IN THE ABSTRACT:

Please replace the Abstract of the Disclosure with the following amended
Abstract of the Disclosure:

An instrument panel image display device (1) ~~is a device for displaying displays~~
an instrument panel image by which various information is provided to a driver. In this
device, the instrument panel image includes a plurality of gauge-like images, ~~disposed~~
~~in displayed at~~ specific positions, ~~each of which indicates a specific image in the~~
~~instrument panel image display device.~~ Further, this device includes an image data
changing section (40) for changing image data, which ~~creates generates~~ each gauge-like
image, into image data, which ~~creates generates~~ another gauge-like image. ~~On this~~
~~account, This makes it is-possible to display a new instrument panel image obtained by~~
combining various gauge-like images. That is, in ~~the~~this instrument panel image display
device (1), it is possible to more freely select the instrument panel image.
